

PRODUCT INFORMATION

Energizer Cream

Supports and Promotes:

Normal Thyroid Function*

Healthy Metabolism*

Healthy Lipid and Carbohydrate Utilization*

Energizer Cream is a transdermal, naturally derived thyroid cream formulated to support and promote normal thyroid function.

Thyroid hormones (T4 and T3) are essential for the function of all body cells. They help regulate growth and the rate of chemical reactions (metabolism). The thyroid synthesizes and stores both of these hormones that help regulate heart rate, blood pressure, body temperature and the rate at which food is converted into energy. Thyroid hormones also help children grow and develop. The thyroid uses iodine to make several of its hormones.

Dosage: For low thyroid function, massage 1/4 teaspoon Thyroid Plus Cream into the skin until absorbed.

For optimal results apply to thinner, softer skin areas such as the face, neck, upper chest, breast, inner arms and thighs and palms of the hands. Periodically rotate areas where cream is applied to avoid saturation

25 applications per container
